Hello All SAs, DEs, and SEs,

Please bill time in Open Air to the base application charge code for time you spend writing designing or writing code that is a PR to a base application you are contributing to. Please start for whatever timesheets you have not yet submitted in the past or this week. We are working to set up a charge code per base application, and we will send a note out when everyone has been added to this.

For now, this is the charge code you can use for base app contributions:

Customer : Project	Task
C3 AI (Internal) : Internal: Product / Operations / DS / Other Supp	c3base Contributions

There may be exceptions to this rule on a customer-by-customer basis. Please defer to your DM / SM if they proactively direct you to charge in a certain place.

Adrian and Adi are aligned on this direction.

Thank you,
