Adrian and Phil,

On Friday (1/26), the USMC pilot concluded development. We moved 1 engineer, Adam Prys, to RDIM after reviewing their phase 2 backlog and determining that they needed support to decrease risk of delivery. We also moved another, Johnathan Cao, to DLA CL III as they are still without their contractors and are falling behind on development without them. Johnathan starts 2 weeks of parental leave starting next week. Arnav Anjaria, the USMC project lead will partly support as needed and will use the rest of his time also supporting CL III. We will revisit assignments pending USMC ph2 signing.

Best

Alejandro
